

The Ambassador™ Range

As an alternative to a mobile laptop storage and recharging solution, LapSafe® Products offer a range of static floor or wall mounted cabinets called the Ambassador™ and the Solo Plus Plus™.

Design & Construction

The Ambassador™ range has been designed and constructed to meet the demands of managing the use of laptop computers and offers a high standard of build quality.

The Ambassador™ includes all the functionality of the known Mentor™ range of cabinets but with two very significant changes:

- Static - The units are static (fixed cabinet)
- SAMs - Each of the laptop storage bays can be individually double locked using optional Secure Access Modules (SAMs)

The Ambassador™ is built incorporating the same modular basis as the Mentor™ Range and is available in capacities up to 25 laptops/50 netbooks per unit. Each Ambassador™ is installed by our own technicians and its surprisingly small footprint makes it ideal for locations within corridor areas or other areas where floor space is at a premium.

Key Features

- Fully welded steel static cabinet
- Up to 25 laptop/50 netbook capacity
- Unique modular construction
- Recharging options; SmartLine™ or ChargeLine™
- Entry/access options, either:
 - Tamperlok™ Security System (illustrated on next page)
 - Two Secure triple locking anti-jemmy outer doors (illustrated below)
- Network capability and alarm optional

Ambassador™ with doors plus SAMs option
