

LapCharger™

MANAGED ULTRA-SAFE CHARGING & POWER FOR LAPTOPS

Introducing the LapCharger™, a power and charging resource for Laptops or Netbooks, providing simultaneous battery charging and safe power for up to 10 devices from a single, central desk position.

LapCharger™

MANAGED ULTRA-SAFE CHARGING & POWER FOR LAPTOPS

The **LapCharger™** is a power and charging resource for Laptops or Netbooks, providing simultaneous battery charging and safe power for up to 10 devices from a single, central desk position.

The **LapCharger™** provides an essential benefit to any classroom using designated devices, ensuring continued 24/7 usage of ICT resources for students. No more flat laptop batteries causing classroom disruption or teachers wasting valuable teaching time on dealing with ICT issues!

Every **LapCharger™** is configured to suit a specific make and model of laptop or netbook*. It features 10 individual cables, therefore a maximum capacity of 10 devices being charged at once in the fastest possible time. These 10 fixed cables provided are available either 1.5m or 3m in length*.

The **LapCharger™** has been designed to be ultra safe and easy for students to use. Simply plug the small connector socket into the power port of the device and instant power is provided.

The **LapCharger™** is temperature controlled fan system and effective ventilation, so it will not overheat. It comes with small LED lights indicating the charging status.

The **LapCharger™** incorporates a standard security slot and has been designed to ensure ventilation can not be blocked, nor power connections damaged and features built in handles for easier transportation.

The **LapCharger™** meets all required British Safety Standards and is Fully CE Certified.

For more information on LapCharger™ call FREE on **0800 130 3456** or visit **www.lapsafe.com**

*Make and model of device to be charged by the LapCharger™ and required cable length must be defined at point of order.
