

The Mentor™ is a fully mobile storage and recharging cabinet, providing security and management for a capacity of up to 30 laptops or 60 netbooks. The cabinet is fully power managed, ensuring all laptops are charged simultaneously in the fastest possible time without blowing fuses. Heat created by the charging process is dispersed by a fully automatic temperature control system.

### CHARGING OPTIONS

#### SmartLine™ option

SmartLine™ features our unique low voltage ultra-safe SmartLine™ modules. This energy efficient charging technology does not require the use of AC adaptors, providing a safe solution for the classroom. SmartLine™ greatly speeds up laptop deployment time and features LED lights to indicate charging status. Each SmartLine™ module (each holding 5 laptops or 10 netbooks) must be pre-configured to a specific make and model of laptop.

#### ChargeLine™ option

ChargeLine™ requires the use of the laptops' own AC adaptors, plugged into the 13amp socket in each bay. Each ChargeLine™ module holds up to 5 laptops or 10 netbooks. This type of charging would be suitable for a variety of different makes and models of laptops.

**Both charging methods allow all laptops to be charged simultaneously in the quickest time possible without tripping, overcharging or blowing fuses.**

### CONSTRUCTION AND CHASSIS

The Mentor™ has an extremely secure and robust, fully welded construction. The doors are 2mm thick steel, reinforced to 4mm and locked with twin 8 lever anti drill high security locks. Anti-jemmy plates and door cover plates provide additional security from attack, whilst the handles are recessed and reinforced. All LapSafe® cabinets are manufactured in the UK to the highest standard, meeting or exceeding British Safety Standards.

#### E - Economy Model Chassis

The E model chassis offers secure storage and charging.

#### S - Superior Model Chassis

The S model chassis offers secure storage and charging as well as a network ready option and an integrated alarm system.

### MODULARITY

A unique aspect of the Mentor range is its modularity. This allows the user to mix and match from a variety of module types, configuring the cabinet to their specific needs. This modularity allows for future upgrades, providing a sustainable solution. The Mentor™ features 6 modules.
