

CrystalKiosk™ - Interactive Information Kiosks

Introduction

Customers today are even more demanding than ever before. They want their purchase to be fast, easy and sometimes entertaining. They want a wide variety of products and services tailored to their needs, with a flexibility of choice. They want instant access to what you're selling or the service that you are providing, 24 hours a day, 7 days a week, 52 weeks a year.

The traditional sales approach can sometimes be time-consuming and expensive, making it impractical to deliver a level of service to meet certain audiences for various products. But, there is an answer: the interactive multimedia kiosk. Available when customer service or sales people are not, kiosks let you transact business with your customers where they are, any time, at their convenience.

Kiosks can deliver a variety of goods and services, from ticket sales to information to "mass customised" products and services. Using kiosks can help you achieve this in a novel, refreshing way. They are interactive and can engage and entertain your customers while completing transactions.

Kiosks aren't new, but with increasing computer literacy and public demand for simple and quick self-service transactions, their popularity is exploding.

Kiosks are part of a multi-channel approach to reaching your customers. Traditional communications and delivery channels are being augmented by the internet, by kiosks and soon by wireless, handheld devices that your customers carry everywhere they go. To take advantage of this you need a multi-channel strategy and an architecture that will support it. Kiosks can be a critical channel to your customers.

The CrystalKiosk™ range from LapSafe® Products is dedicated to meeting all of these goals.

CrystalKiosk™ - Interactive Information Kiosks

CK8917 Kiosk with 17" Touchscreen

Introduction

Under an undoubted elegant and stylish appearance the CrystalKiosk™ CK8917 is much more than just skin deep. A user friendly ADA compliant kiosk equipped with 17-inch hi-brightness LCD monitor, vandal-proof touchscreen, 2mm thick metal enclosure with industrial powder coat finish plus a pair of constructive aluminium side rods. The CK8917 is announcing its robustness, durability and perfect fit for most unattended indoor public access areas.

An outstanding addition to the CK8917 is the optional 19" TFT screen which can be mounted on the top of the kiosk. This allows for high profile messaging and advertising to be independently displayed whilst the lower screen is being used.

The CK8917 is available in almost any colour and can incorporate your own company branding or visual design, creating an eye catching aesthetically pleasing unit.

The CK8917 Kiosk comes complete with the relevant multimedia hardware required for to apply professional content including speakers. It can be delivered to you as either a completely blank canvas to create your own content or with content provided, tailored to your exact requirements and designed by our graphics professionals.

The CK8917 can also incorporate a Thermal Printer allowing for instant ticket, receipt or information print outs to the user.

Optional Extras

- RAM Upgrade from 1GB to 2GB
- Insert Type MSR with flush bezel
- Epson 80mm Thermal Printer
- Metal Keyboard with Trackerball
- Webcam
- 19" 2nd Display
