

EcoSuite™ The Green ICT Solution

Guaranteed to **reduce** your...

Energy usage

Carbon footprint

Equipment costs

ICT maintenance costs

... and helping you to meet
Government legislation!

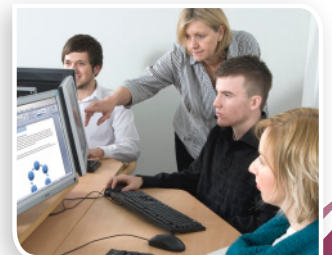

With the Government's target for all new schools to be carbon neutral by 2016, the EcoSuite™ offers a proven 'GREENER' ICT solution.

Providing a top quality PC experience for 6 users at a fraction of the cost the EcoSuite™ uses up to 80% less electricity than an equivalent number of traditional PCs, whilst dramatically reducing your carbon footprint and electronic waste.

The EcoSuite™ provides an excellent alternative to a dedicated ICT suite occupying up to 60% less space than more traditional desking layouts. The EcoSuite's design supports independent and group learning activities across the curriculum.

Fitted with virtual desktops, the EcoSuite™ overcomes the challenges of deploying dedicated PCs by enabling virtual independent desktops for up to 6 users with no loss of computing performance. The EcoSuite™ delivers an efficient, secure, multimedia interface.

Energy Efficient

The EcoSuite™ for 6 users uses up to 80% less energy than the equivalent number of PCs. Its virtual desktops use 1 watt of electricity per added user, compared to that of standard PCs that use an average 115 watts per PC, or up to 200 watts or more for older models.

Low Carbon Footprint

Electronic waste is dramatically reduced with the EcoSuite™. The virtual desktops' construction requires radically less electrical components than that of traditional PCs. Recycling existing keyboards and mice in use, would further reduce electronic waste.

The EcoSuite™ radically cuts power consumption and greatly reduces electronic waste which contributes to a high reduction in your Schools carbon footprint. For example over a 5 year period an EcoSuite™ can save up to 2.46 metric tons of Carbon Dioxide emissions.

Space Saving

The EcoSuite™ has a small footprint offering a solution for classrooms where space is at a premium. The clever use of independent horizontal work surfaces interact with the small footprint without compromising user work space.

This intelligent furniture only takes up some 60% of the space that would have been required to accommodate a more traditional ICT suite.

Its 6 user formation also provides the ideal positioning for group or "cluster" learning activities.

Agile

The EcoSuite™ is a mobile self contained unit. It can be moved from classroom to classroom when needed, enabling the sharing of valuable ICT resources. The collapsible sides make the EcoSuite™ flexible and easily stored until required. An additional benefit is that the EcoSuite™ requires on 1 power socket and 1 network point!

Low Cost of Ownership

The EcoSuite™ has a low cost of ownership for example; over a 5 year period you can save on average £2,800 in operating costs...that's a 73% reduction!

Upgrading the EcoSuite™ in future is easy. By upgrading or replacing the host PC, EcoSuite™ users immediately benefit from the new plug and play technology. For example in year 6 (typical upgrade period) you can save the equivalent of £4,371 on an the average ICT refresh...that's a 50% saving!
