

Premium Security Cable

One of the most effective and visible deterrents for anyone wanting to protect a laptop in a semi-fixed position is a security cable.

These easy to fit cables are made of high tensile steel and come fitted with an anti-drill lock and a variety of keying options.

The cables can also be used on the move by easily attaching to any solid fixed object, such as a radiator, desk or even outside on a park bench.

Key Features

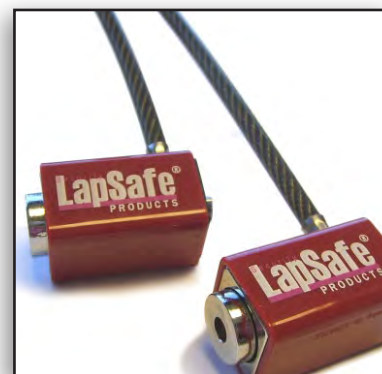

- Suitable for any IT equipment with a security slot
- Quick and easy to install
- Unique lock that automatically adjusts to the depth of security slots
- Unpickable high security Disk Tumbler lock
- High tensile steel Smoked Grey 1.8m long cable
- Effective visual deterrent
- Key retains when unlocked to prevent key loss
- Two keys provided with every cable
- High security 9 disk lock giving 20,000 differs
- Available keyed to differ and master keyed

Security Storage Boxes

The opportunist thief is always on the look out for something to snatch from a desk, classroom or home. Our range of fully welded steel enclosures will keep any precious items out of site and safely secured.

Dependent on model, these individual safes can securely store anything from a laptop, camera, mobile phone, PDA or even private files or documents. Ideal for day or overnight use, the unit is securely fastened by way of a fixing plate to office furniture, the floor or even a wall. The units can even be attached to each other to create greater storage space and flexibility.

Key Features

- High security locks with anti-drill centre
- Available keyed to differ, keyed alike and master keyed
- Fixing plate supplied
- Comes with foam base insert to protect fragile equipment
- Aperture in rear and side so you charge your electronic device whilst it is securely locked away
- Durable powder coated steel construction
- Units can be stacked together to form multiple units
