

Midi Mentor™

Mobile storage and charging cabinet

The Midi Mentor™ is a fully mobile storage and charging cabinet, providing security and management for a capacity of 20 laptops or 40 netbooks. The cabinet is fully power managed, ensuring all laptops are charged simultaneously in the fastest possible time without blowing fuses. Heat created by the charging process is dispersed with a fully automatic temperature control system.

SmartLine™ Charging

SmartLine™ is our unique low voltage ultra-safe charging solution. This energy efficient charging technology does not require the use of AC Adaptors, providing a safe solution for the classroom. SmartLine™ greatly speeds up laptop deployment time and features LED lights to indicate charging status. Each SmartLine™ module (each holding 5 laptops or 10 netbooks) must be pre-configured to a specific make and model of laptop.

ChargeLine™ Charging

ChargeLine™ charging uses the laptops' own AC adaptors plugged into a standard 13 amp socket. The power sockets are easy to access with ample space allowed for the AC Adaptor to be stowed beside the laptop. To ensure user safety the 240 power is automatically switched off whilst the cabinet doors are open. Power is only regained when the doors are safely shut.

CONSTRUCTION

The Midi Mentor™ has an extremely secure and robust, fully welded construction. The doors are 2mm thick steel, reinforced to 4mm and locked with twin 8 lever anti drill high security locks. Anti-jemmy plates and door cover plates provide additional security from attack, whilst the handles are recessed and reinforced.

The Midi Mentor™ offers two types of model chassis:

'E' MODEL

Secure storage and charging

'S' MODEL

Secure storage and charging, factory fitted alarm and network capability option

MODULARITY

A unique aspect of the Mentor™ range is its modularity. This allows the user to mix and match from a variety of module types, configuring the cabinet to their specific needs. This modularity allows for future upgrades, providing a sustainable solution. The Midi Mentor™ features 4 modules.

All LapSafe® cabinets are manufactured in the UK to the highest standard, meeting or exceeding British Safety Standards.

Key Features

- Provides secure storage and safe charging
- Extremely robust construction
- Enhanced door security
- Fully upgradeable patented modular design
- Automatically temperature control
- Fully power managed
- Simultaneous charging in the fastest possible time
- Twin locking castor wheels
- Fully mobile cabinet

Midi Mentor™ Specification

Laptop Capacity	20
Netbook Capacity	40
No. of Modules	4
Height (cm)	88.0
Depth (cm)	60.5
Width with handles (cm)	124.0
