

## PC Tower Lockdown

The Tower Lockdown range offers a highly visible theft deterrent. This range provides static protection for tower PCs and small servers that will deter even the most confident criminal.

Our Tower Lockdown Systems come in 4 sizes, are reliable and very easy to use. They offer an affordable security solution for the home, office, classroom or even the retail environment. They are designed to ensure accessibility for cabling and drives and do not restrict air flow to CPU fans. All our lockdowns come fitted with high security locks and are available keyed to differ or keyed alike to suit your needs.

### Key Features

- Secures ultra and small form factor PCs plus small servers
- Vinyl coated to protect tower from damage
- Allows accessibility to communication ports
- Fitted with high security anti-pick tamper resistant locks
- Available keyed to differ and keyed alike

### Dimensions (mm)

PRODUCT	HEIGHT	WIDTH	DEPTH
F1000	430	108	430
T1000	370	235	460
T2000	533	270	510
T3000	660	270	510

### Information

CODE	DESCRIPTION	WEIGHT
SP/T1000	Compucage Tower 1000 Series	5.00kg
SP/T2000	Compucage Tower 2000 Series	7.30kg
SP/T3000	Compucage Tower 3000 Series	8.20kg
SP/F1000	Compucage SFF F1000 Series	3.80kg

## PC Security Cage

The CPU-66 is a lockable PC security cage that is available in both black and silver finishes. This PC holder is available for both slim line and normal PC widths.

The lockable cage is perforated for ventilation and with adjustable rear and front security bars for convenient cable access.

### Key Features

- Lockable security cage, perforated for ventilation
- Adjustable rear and front security bars for cable access
- Configurable to your own specifications

### Dimensions (mm)

PRODUCT	HEIGHT	WIDTH	DEPTH
CPU-66	520	215	540

## CPU Holders - Economy

Our comprehensive CPU Holder Economy range are secure bracket and strap systems providing a convenient solution to storing and improving access to your CPU.

### Key Features

- Fixing bracket attaches to under side of desk or worktop
- Suitable for tower and desktop processors to max 1800mm circumference
- Securing straps can be easily tightened to safely hold the PC

### Models

- CPU-42 Fixed bracket with straps
- CPU-57 Sliding bracket with straps allowing greater accessibility
- CPU-72 Sliding and rotating bracket with straps allowing sliding and rotation through 180 degrees
- CPU-92 As CPU-72 but incorporating high-end bracketery for easier installation

### Information

CODE	DESCRIPTION	WEIGHT
SP/CPU-42	CPU Holder - Fixed version with straps	2.00kg
SP/CPU-57	CPU Holder - Slide version with straps	3.00kg
SP/CPU-72	CPU Holder - Sliding/Rotating version with straps	3.00kg
SP/CPU-92	CPU Holder - Premium unit Sliding/Rotating version with straps	3.00kg

CPU-42 with fixed bracket & strap (SP/CPU-42)

CPU-72 sliding & rotating bracket (SP/CPU-72)

## CPU Holders - PRO

Our comprehensive CPU Holder PRO range are metal brackets providing a convenient and simple solution to storing, securing and improving access to your CPU.

### Key Features

- Substantial retaining system attaches to the under side of a desk or worktop (minimum 25mm thickness)
- Suitable for tower processors only
- Brackets adjust for width (23cm) and height (62cm) of CPU

### Models

- CPU-87 Fixed metal bracket
- CPU-87L Lockable fixed metal bracket
- EX-1220 Sliding metal bracket with straps allowing greater accessibility

### Information

CODE	DESCRIPTION	WEIGHT
SP/CPU-87	CPU Holder - Fixed metal bracket version	3.00kg
SP/CPU-87L	CPU Holder - Lockable Fixed metal bracket version	4.00kg
SP/EX-1220B	CPU Holder - Swivel bracket with sliding track for use with CPU-87	4.00kg

CPU-87 with fixed metal bracket (SP/CPU-87)

1220B Swivel/Slide Track for CPU-87 (SP/EX-1220B)

## PCKit Range

These kits include specially selected components making it possible to easily anchor both the system cabinet (CPU) and the monitor to a fixed position in the workplace.

PCKit range is simple and extremely effective. : place the screw cylinders in the VESA connection holes in the back of the monitor, feed the cable through them and then guide the cable to the PC via a loop around the table leg and secure it with the lock (together with the SecuClip provided if desired) or vice versa.

Since this set does not require an adhesive, it is the ideal solution for leased equipment.

- PCKit I SaveLine includes:  
1.8m 7mm diameter cable, 40mm padlock, 2x unilocks, 1x secuclip
- PCKit I SaveLine Pro includes:  
2m 9mm diameter cable, 40mm padlock, 2x unilocks, 1x secuclip
- PCKit II SaveLine includes:  
1.8m 7mm diameter cable, 35mm padlock, 1x looper, 2x secuclips
- PCKit II SaveLine Pro includes:  
2m 9mm diameter cable, 35mm padlock, 1x looper, 2x secuclips

Secuclip

Looper

## SecuKit III ProLine Black

Three superstrong steel security limpets are at the heart of this security system. These limpets are linked with a secure steel cable. The diameter of this special cable is at least twice as thick as most of the other cable security systems on the market.

Furthermore the high security lock is of an incomparable security level. The special profiled keys are extremely secure and cannot be duplicated. This profile makes lock picking almost impossible.

- SecuKit III ProLine includes:  
3x steel security plates, 2m 9mm diameter cable, 1x looper,  
1 x high security padlock
