

Solo Plus + Charging and storage

For situations where a small number of devices need to be stored and charged in a single secure fixed cabinet, the Solo™ Plus + provides the ideal solution.

This fully welded enclosure stores and charges up to 5 laptops, 10 netbooks, or various other devices using our modular system as with the Mentor™ range.

Supplied with a high security locking steel door the Solo™ Plus + can be modified to fit to bespoke furniture, can be surface mounted or stacked to a height of two enclosures using suitable fixing plates.

Charging Options

LapSafe® offer two types of charging; SmartLine™ and ChargeLine™. In both cases LapSafe's own safe power management system ensures all devices are charged simultaneously in the fastest possible time without overcharging, blowing fuses or tripping circuit breakers.

SmartLine™ with PowaSave™

Energy efficient

Reduces 'duration charging' energy consumption

Ultra-safe

No access to 240 volt power and independently CE Certified

Requires no AC adaptors

No messy wires to contend with

Surge protection

Protected against power surges

LED indicator lights

Charging status is highlighted with an LED

ChargeLine™

Uses AC adaptors

Ample storage space provided for AC adaptors

Surge protection

Protected against power surges
