- Top mounted socket with USB connectivity for the MacBook

*3 year
warranty

*1 year on-site and 2 years return to base

Features and benefits

Safe Storage

The UnoCart™ iPad charging trolley includes a secure overnight storage space for a MacBook with a ChargeLine™ socket for charging within the cabinet, (allowing iPads to sync to the MacBook using iTunes), effective USB cable management and a top mounted power socket with USB connectivity for the MacBook.

A built-in NoteLok™ security cable secures the MacBook whilst on top of the cabinet during the synchronisation process.

Charging

The UnoCart™ iPad charging trolley offers full rate, safe charging for iPads (2.1A charging for synchronisation functionality) and 1 Macbook or laptop available in 16 or 32 iPad bay versions.

Construction

Engineered in the UK by market leaders LapSafe® Products.

Share iPad ICT resources between classrooms, whilst providing safe student access to fully charged mobile computing.

The rear of every cabinet has a service access door designed for ICT technician's use, with different locks to the front, which prevents both access by students, and theft access to the devices stored inside.

All UnoCart™ iPad charging trolleys have been independently CE Certified and meet HSE guidelines.

Additional Options

Charging options available:

'Sync only', 'Charge only' and 'Sync and Charge'. A factory setting or training can be given to provide scheduled 'Sync and Charge' cycles to be communicated to the iPads.

UnoCart™ for 16 iPads

UnoCart™ for 32 iPads

	Size (mm)			Weight
	Width	Height	Depth	
UnoCart™ for 16 iPads	626	1202	550	80kg
