

Locking Solutions

To Compliment the LapSafe® Range

LapSafe® 

LapSafe® Lock Range

A Lock Suitable For Every Need

As a leading manufacturer of storage, charging and loaning systems, LapSafe® Self-Service Solutions partner with some of the World's leading-lock suppliers to enable us to provide best of breed products.

We supply and configure various lock types as well as manufacture our own electronic locking systems for our sophisticated smart lockers.

Keyed Locks

Simple Keyed Cam Lock

A range of either cam-style or safe locks are fitted in our product ranges. Locks are available with matching keys or differentiating keys to offer levels of access and some degree of control and responsibility.

Keyed locks offer a simple solution to secure your trolley or locker without complexity.

- Cost Effective Locking Solution
- Simple & Easy to Use
- Available Keyed to Differ & Keyed Alike
- The Diplomat™ range can be master keyed

PIN Code Lock Options

KitLock KL1000

Cost Effective PIN Code Lock

The KL1000 lock is an easy to use keyless lock using PIN codes to lock and unlock your trolley or locker. The lock will perform around 15,000 openings on just two AAA batteries. Locks can be quickly programmed to operate in one of two modes, and up to three code levels can be used to control access.

Diplomat™ Range

FLEX™ Range

BeCode® miniPAD

Sleek PIN Code Option

The BeCode™ MiniPAD is a simple keyless locking solution with a 'slam-latch' style locking bolt. This makes it ideal for use in our range of lockers where quick access and easy operation is required.

Available in both Private and Public modes to suit your requirements.

Private Mode

The most common function and where the same ID card will be used on the same lock continuously

Public Mode

User locks the lock with their own ID card and after use the lock is freed up for a new user

KitLock KL1000 G3 NetCode

Compact Digital Lock

The KL1000 G3 NetCode is an evolution of the KL1000. Boasting popular features from the KL1000 Classic+ including 20 User Codes, 24hr countdown timer¹ and introducing key override. The KL1000 G3 NetCode's key override and front battery change capabilities provide ease of use and peace of mind. The updated chrome effect back panel and handle finishes reflect their surroundings giving the lock a slimmer, more subtle aesthetic.

NetCode Technology

The KL1000 G3 NetCode utilises technology allowing generation of date/time-sensitive temporary access codes: NetCodes. Once generated, NetCodes can be shared via email or SMS, and will expire after their set duration - ideal for visiting service engineers, delivery personnel and short / medium-term locker rental.

ClassBuddy™ Range

Diplomat™ Range

FLEX™ Range

- Date/time specific code generation
- Send generated codes via email or SMS
- No WiFi connection required
- Front battery change
- Key Override & Battery Override
- Private, Public + NetCode Functions
- Up to 20 User Codes
- Auto-unlock after a set time
- Slam latch accessory available

KitLock KL1050

Cost-Effective MIFARE® Lock

The KL1050 is a simple, smart card lock providing codeless and keyless access to our lockers and trolleys. Functions for single users (Private mode) and short-term use by multiple users (Public mode) similar to that found on the KL1000. The lock will perform up to 15,000 openings on just two AAA batteries.

A variety of technologies are supported, including MIFARE® Classic, MIFARE® Desfire (incl EV1 4k), and MIFARE® Ultra-Lite.

- Master User Card
- Technician Card
- Up to 15,000 operations from 2 x AAA batteries
- Battery override

User locks the lock with their own ID card and after use the lock is freed up for a new user

Intelligent Online Management

BeCode® miniPAD TANmode

Advanced Online Code Generation

TANmode offers cloud based intelligent software that enables the individual management of each lock. TANmode automatically creates random codes, transmits these to the respective users and allows administration online or via a mobile device.

Diplomat™ Range

DynamiX™ Range

KitLock KL1060

Cost Effective Online Code Generation

NetCode is the smart way to generate time-sensitive codes for a wide range of our lockers and trolleys.

Through the online NetCode Portal or via the Codelocks simple API, you can create codes that have a specified start date, time and duration. Once the period expires, the codes no longer work. Using time-sensitive codes is a more secure way to grant access as codes expire, and the locks cannot be used outside of a designated time slot.

Issue codes to visiting service engineers, delivery personnel (drop boxes), and medium-term locker rental. Generated codes can be sent by email or SMS.
